PROFESSIONAL SUMMARY

AI & Machine Learning student (B.Sc. Artificial Intelligence, Benha University, expected 2027) with hands-on experience building, evaluating, and deploying classification and regression models using Scikit-Learn, XGBoost, and LightGBM. Delivered an end-to-end hotel booking cancellation prediction system as an NTI graduation project, from data preprocessing through Gradio-based deployment. Comfortable translating technical results for non-technical audiences; currently expanding practical experience through DEPI's Machine Learning track.

EXPERIENCE

Machine Learning Track Trainee — Digital Egypt Pioneers Initiative (DEPI) Jul 2026 – Dec 2026 (Ongoing)
Ministry of Communications and Information Technology (MCIT)

- Completing a Machine Learning track covering EDA, feature scaling/selection, supervised algorithms (XGBoost, LightGBM, Random Forest), evaluation metrics (ROC-AUC, F1-Score, Precision, Recall), hyperparameter optimization, and model deployment tools (Flask, FastAPI, Streamlit).

FEATURED PROJECTS

Hotel Booking Cancellation Prediction — NTI Graduation Project Jul – Aug 2026
GitHub: github.com/Ahmed-Wahied/Hotel-Booking-Cancellation-Prediction

- Trained and compared 7 classification algorithms — including Random Forest and XGBoost — using Python, Pandas, and Scikit-Learn to predict hotel booking cancellations, achieving 83.2% accuracy and a 0.724 F1-score with the top-performing Random Forest model.
- Performed data cleaning, outlier removal, missing-value imputation, and feature engineering; evaluated models on Precision, Recall, and F1-Score, reaching 80.8% recall on the test set.
- Deployed the trained model as an interactive Gradio web application and presented its business impact to non-technical NTI mentors and evaluators, translating technical results into actionable insights.

Lung Cancer Risk Classification Personal Project

- Built an end-to-end lung cancer risk classification pipeline in Python and Scikit-Learn, applying feature normalization, categorical encoding, and class-imbalance handling; compared Logistic Regression, Random Forest, SVM, and Ensemble Learning approaches, prioritizing Recall and F1-Score for health-risk prediction.
- Achieved 93.3% accuracy, 98.1% precision, 94.6% recall, and a 96.4% F1-score with the top-performing SVM model.

Spam Detection Pipeline (NLP) Team Project — University Coursework

- Collaborated on a team-built text classification pipeline — data cleaning, tokenization, vectorization, model training, and evaluation — to classify messages as spam or not-spam based on keyword and content patterns.
- Achieved 81% accuracy, 80.66% precision, 84.1% recall, and a 83.7% F1-score with the top-performing SVM model.

EDUCATION

B.Sc. in Computers and Artificial Intelligence — Benha University 2023 – 2027 (Expected)
Major: Artificial Intelligence

TECHNICAL SKILLS

Core Skills: Python, Machine Learning, Feature Engineering, EDA, Data Preprocessing, Model Evaluation and Tuning, Pandas, NumPy, Scikit-Learn, XGBoost, LightGBM, SQL, Git, NLP, Data Cleaning, Cross-Validation, Data Visualization

Frameworks & Deployment: Scikit-Learn, XGBoost, LightGBM, Random Forest, Logistic Regression, Gradio (hands-on); familiar with PyTorch, TensorFlow, Streamlit, Flask, FastAPI

Other Tools & Languages: Python, SQL, C++, Matplotlib, Seaborn, Git, GitHub

SOFT SKILLS

Communicate clearly and concisely, Effective Time Management and Allocation of time resources, Team work effectively, Excel in analytical thinking, Demonstrate strong problem-solving skills, Take initiative effectively, Maintain strong focus and attention to detail, Adapt dynamically to changing situations, Thrive in competitive environments .

COURSES

Machine Learning Summer Training — NTI / ITIDA Jul – Aug 2026

- 120 hours (90 technical + 30 freelancing); Score: 84.5%. Covered the full ML workflow from data preprocessing to deployment, culminating in the Hotel Booking Cancellation graduation project.
- Completed 5+ hands-on machine learning projects using real-world Kaggle datasets, applying the full workflow from data preprocessing to model evaluation.

CERTIFICATIONS

HCCDA-AI (Huawei Certified Cloud Developer Associate – AI) — Huawei Cloud

Completed 5+ hands-on labs on Huawei Cloud's KooLabs platform to reinforce practical AI development skills ahead of certification.

Issued Mar 2026 | Expires Mar 2029 | Credential ID: HWENDCAIDA584710

LANGUAGES

Arabic: Native | English: Very Good

EXTRACURRICULAR ACTIVITIES

NTI B2 Final Competition (Regression) — Kaggle

- Ranked 12th of 21 in an NTI Kaggle competition forecasting nightly Airbnb prices in NYC.
